

CCEVS APPROVED ASSURANCE CONTINUITY MAINTENANCE REPORT

ASSURANCE CONTINUITY MAINTENANCE REPORT FOR

IBM WebSphere DataPower SOA XS40 XML Security Gateway and X150 Integration Appliance Version 3.8

Maintenance Report Number: CCEVS-VR-VID10020-2008a

Date of Activity: 04 November 2009

References: Common Criteria document CCIMB-2004-02-009 "Assurance Continuity: CCRA Requirements", version 1.0, February 2004;

"DataPower XS40 XML Security Gateway and DataPower XI50 Integration Appliance Version 3.8, Impact Analysis Report", version 1.0, dated 30 September 2009

Documentation Updated: IBM WebSphere DataPower SOA appliances developer evidence documents.

Assurance Continuity Maintenance Report:

The vendor for the Foundry DataPower XS40 XML Security Gateway and X150 Appliance Version 3.6, IBM, Inc., submitted an Impact Analysis Report (IAR) to CCEVS for approval on 30 September 2009. The IAR is intended to satisfy requirements outlined in Common Criteria document CCIMB-2004-02-009, "Assurance Continuity: CCRA Requirements", version 1.0, February 2004. In accordance with those requirements, the IAR describes the changes made to the certified TOE, the evidence updated as a result of the changes, and the security impact of the changes.

Changes to TOE:

Product documentation upgrades were made in order to accommodate the rebranding of the product from DataPower Technology, Inc to IBM, Inc. In addition, software changes are limited to bugfixes related to non-security relevant functionality of the product.

Conclusion:

The changes to the TOE environment were analyzed and found to have no effect on the security of the evaluated TOE. The non-security relevance of the changes leads to the conclusion that the updates can be classified as a **minor change** and that certificate maintenance is the correct path to continuity of assurance.
