

Enhance Smart Card Business through Common Criteria

Dr. Chil Hee Chung
Samsung Electronics

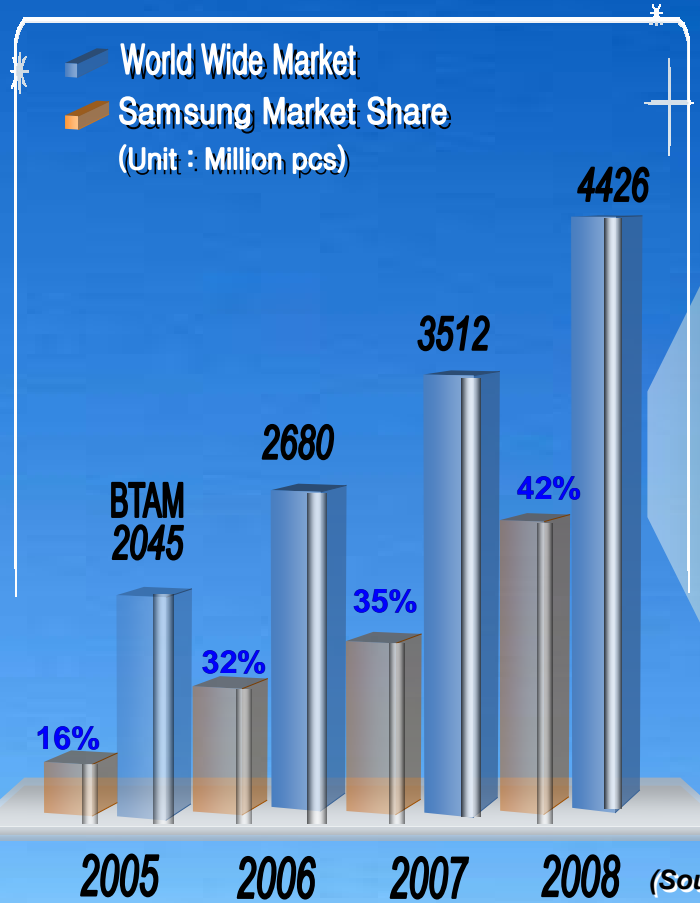

- ❖ **Smart Card Market Overview**
- ❖ **Samsung Smart Card IC Business**
- ❖ **Smart Card IC & Process Technologies**
- ❖ **Common Criteria Certification and Security**
- ❖ **Conclusion**

Samsung Smart Card IC Business

❖ Business Performance by Year (2005~2008)

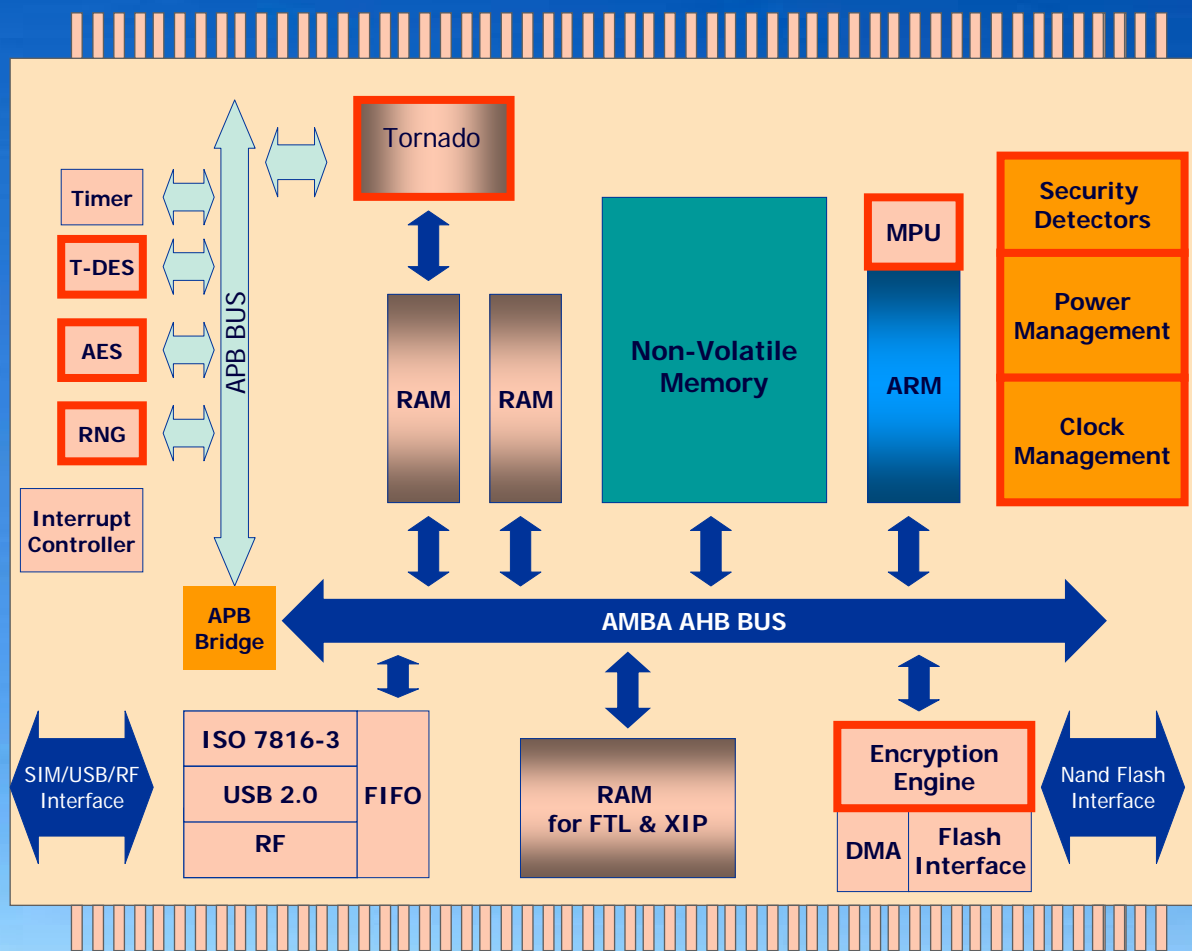

*2008 Global Smart Card IC Competitive Strategy Leadership Award by Frost & Sullivan

Payment

National -ID

e-Passport

IP TV

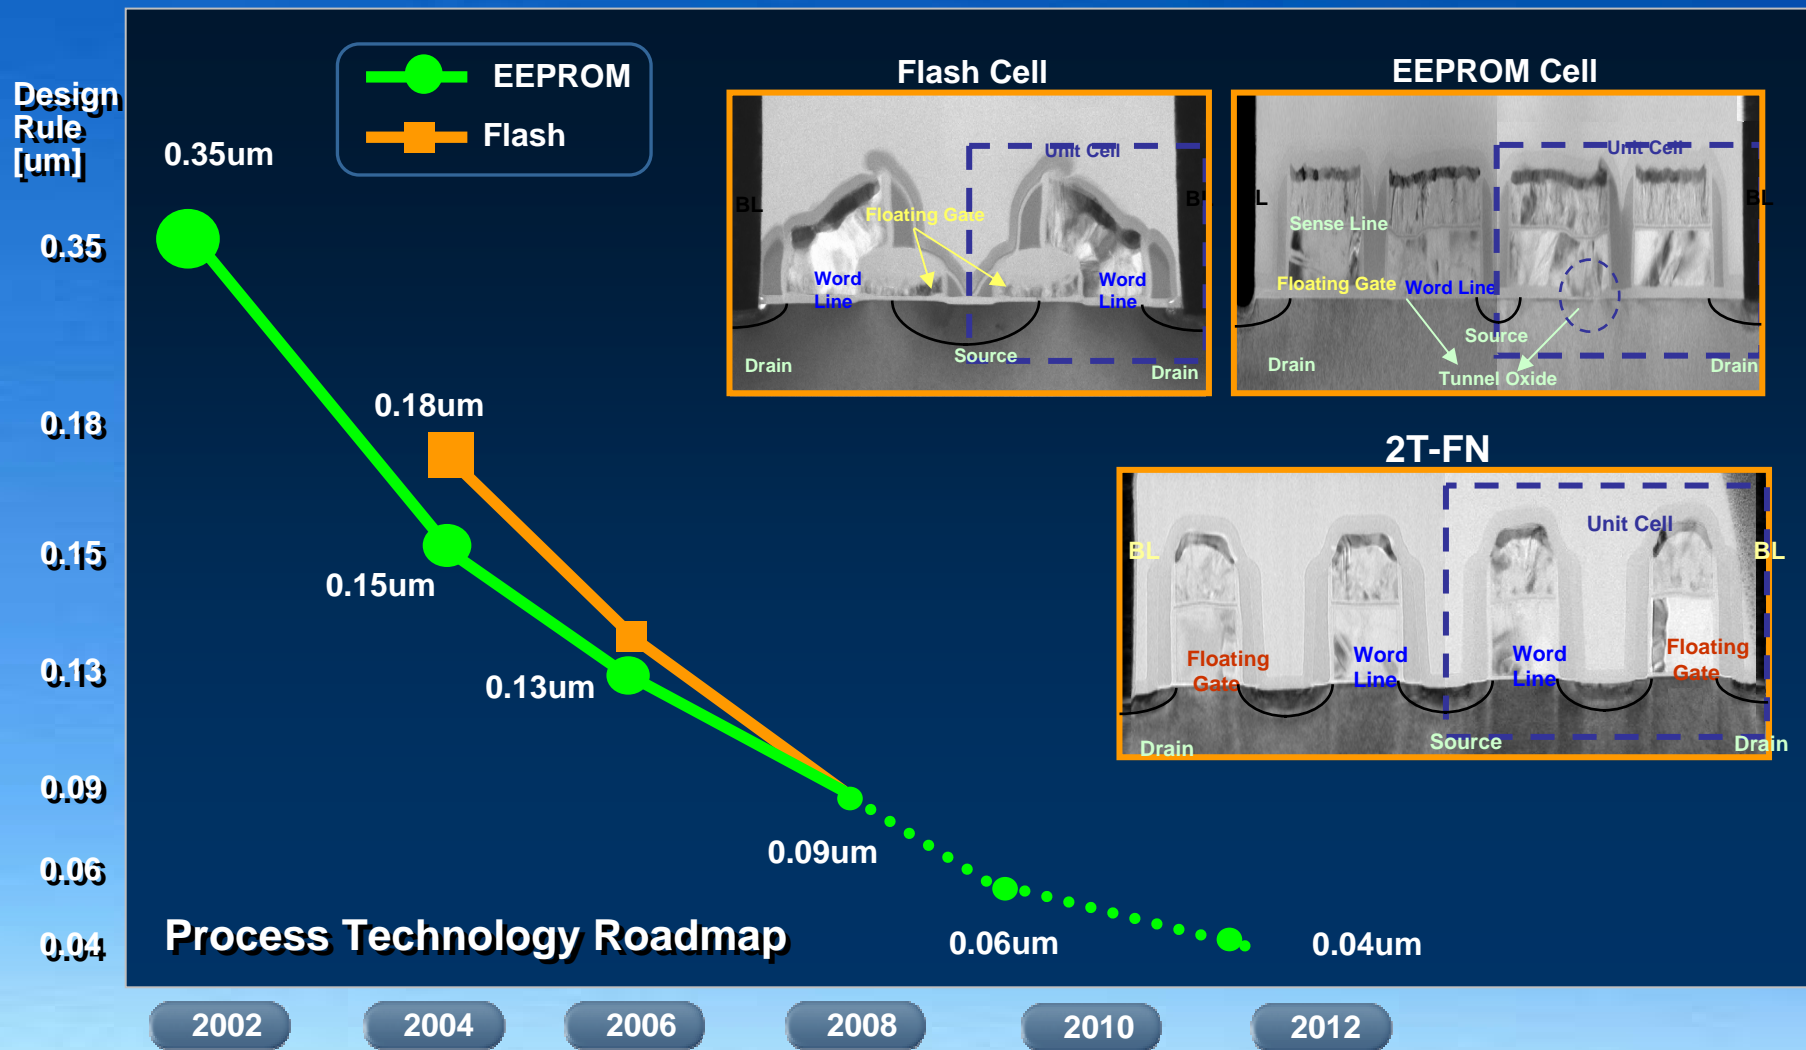

Samsung Makes the Difference !

- ❖ **Advanced Process Technology**
- ❖ **Leading Advanced Product Development**
- ❖ **Develop New Product Concept**
- ❖ **Leading on Security Engineering**

Smart Card IC Technologies

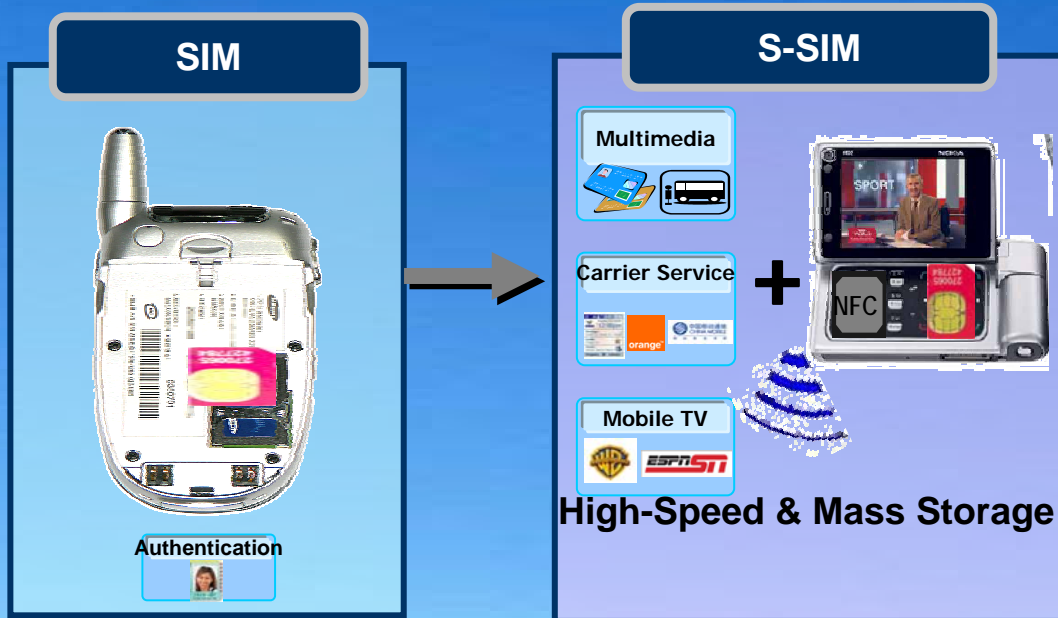

❖ *Fastest moving IC Supplier toward technology migration*

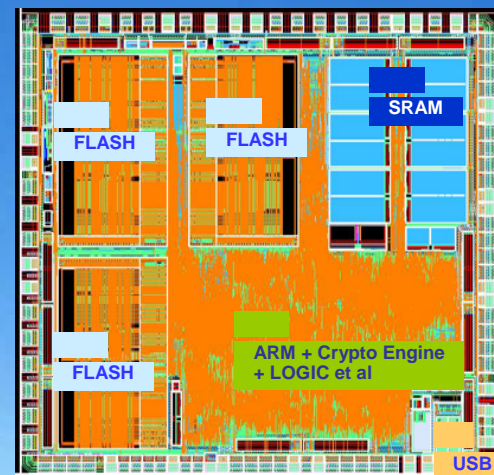

Samsung Lead High-End Smart Card

❖ *A higher value-added business*

- ◆ *Innovative technology such as S-SIM will lead SIM industry in near future. (High Density SIM, SWP & NFC)*
- ◆ *S-SIM (S3FS9CI) – the First CC certified product in High Density SIM*

<CC certificate>

<S-SIM Chip Layout>

Samsung Makes the Difference !

SAMSUNG

❖ *One chip S-SIM*

● *Embedded NAND*

Reduce PKG cost

- Legacy COB compatible
- No external capacitor for NAND flash memory
- No extra wire bonding

High Security

- Fully Embedded Memory
- No external memory interface

Better Functionality

- Fast Read Cycle
- Easy to Use

Cost Effective

- Large density memory to use code execution
- Low packaging cost

One Chip S-SIM takes both advantages from high-speed data read function of NOR flash and the advanced data storage function of NAND flash

Common Criteria in the Market

- ❖ *Standard security measure in Smartcard*
- ❖ *Strong needs in FS & ID market*
- ❖ *e-Passport requires CC EAL4+ or higher*

Cumulated Number of Certificates

CC EAL5+ Certificates

Common Criteria Achievement

- ❖ *As many as possible evaluators and evaluation schemes*
- ❖ *Lately, we got the certificate from Korean Scheme*

Samsung Smart Card Security

❖ *Endless Security Improvements*

- **Basic Security Features (V,F,L,T)**
- **Shield**
- **Secure Layout**

Information Leakage Free Hardware Design

- **Laser Detector**
- **Active Shield**
- **Memory Encryption**

Secure DES, AES, RSA

Research & Improve

Benefits from Common Criteria

**Test
Improvements**

**Design
Improvements**

**Quality
Improvements**

**Security
Improvements**

- ❖ *Gives a trust*
- ❖ *Make more business chances*
- ❖ *Revenue increasing*

- ❖ Samsung has developed many new and advanced security features while performing Common Criteria evaluation, which has improved the product security level.
- ❖ As Samsung has got more Common Criteria certification, customer's trust in Samsung smart card.
- ❖ Samsung smartcard business will be enhanced numerously through Common Criteria.

**Advanced
Technology**

**High
Security**

**Manufacturing
Excellence**

**Worldwide #1
Chip Supplier**

**Readiness
For the Future**

World Best Smartcard IC Partner

Thank You!
