German Common Criteria Certification Scheme

Position Statement

DBMS cPP Security Problem Definition, Version 1.0

PURPOSE: The intent of this Position Statement is to make it publicly known that the Federal Office for Information Security

• recognises the need for evaluated products that are suitable to address the security problem defined in the DBMS cPP SPD, and
• acknowledges that the SPD appropriately scopes the security problem to be addressed by such software

SCOPE: The Federal Office for Information Security will revisit its position during each stage of the DBMS collaborative Protection Profile (cPP) development.

In case the Federal Office for Information Security endorses the resulting DBMS cPP and the associated Supporting Documents, it will recommend the cPP for product evaluations within the German Common Criteria Certification Scheme.
