

Assurance Continuity Maintenance Report

BSI-DSZ-CC-0423-2007-MA-01

**S-TRUST Sign-it base components 2.1,
Version 2.1.5.1, SP 1**

from

OPENLiMiT SignCubes AG

Common Criteria Arrangement
for components up to EAL4

The IT product identified in this report was assessed according to the *Assurance Continuity: CCRA Requirements*, version 1.0, February 2004 and the developers Impact Analysis Report (IAR). The baseline for this assessment was the Certification Report, the Security Target and the Evaluation Technical Report of the product certified by the Federal Office for Information Security (BSI) under BSI-DSZ-CC-423-2007.

The change to the certified product is at the level of source code and updates the product to maintain the support of a modified smart card belonging to the security environment, a change that has no effect on assurance. The identification of the maintained product is indicated by a new version number compared to the certified product.

Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path to continuity of assurance.

Therefore, the assurance as outlined in the Certification Report BSI-DSZ-CC-0423-2007 is maintained for this version of the product. Details can be found on the following pages.

This report is an addendum to the Certification Report BSI-DSZ-CC-0423-2007.

Bonn, 24. Oktober 2007

Assessment

The IT product identified in this report was assessed according to the *Assurance Continuity: CCRA Requirements* [1] and the Impact Analysis Report (IAR) [2]. The baseline for this assessment was the Certification Report of the certified TOE [3], the Security Target [4] and the Evaluation Technical Report as outlined in [3].

The vendor for the S-TRUST Sign-it base components 2.1, Version 2.1.5.1 SP 1, OPENLiMiT SignCubes AG, submitted an IAR [2] to the BSI for approval. The IAR is intended to satisfy requirements outlined in the document *Assurance Continuity: CCRA Requirements* [1]. In accordance with those requirements, the IAR describes the changes made to the certified TOE, the evidence updated as a result of the changes and the security impact of the changes.

The S-TRUST Sign-it base components 2.1 were changed due to maintain the support of a modified smart card. As the identifying feature of the ZKA Banking Signature Card, v6.6 from Giesecke & Devrient changed, the S-TRUST Sign-it base components 2.1 were updated in order to detect the smart card correctly. The change is not significant from the standpoint of security, however Configuration Management procedures required a change in the version number from S-TRUST Sign-it base components 2.1, Version 2.1.5.1 to S-TRUST Sign-it base components 2.1, Version 2.1.5.1 SP 1.

Conclusion

The change to the TOE is at the level of source code to maintain the support of the modified smart card ZKA Banking Signature Card, v6.6 from Giesecke & Devrient, a change that has no effect on assurance. Examination of the evidence indicates that the changes required are limited to the identification of the delivered software and thus of the TOE. The Security Target [4] was updated accordingly. Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path to continuity of assurance.

Therefore, BSI agrees that the assurance as outlined in the Certification Report [3] is maintained for this version of the product. This report is an addendum to the Certification Report [3].
