

NDFW iTC allowed-with list for Stateful Traffic Filter Firewall PP Module

Allowed-with list version	1.4r1
Date	2 March 2020

PP-Module to which this list applies	PP-Module for Stateful Traffic Filter Firewalls
Latest definitive PP-Module version	V1.3, 27 September 2019
Supporting Document for PP Module	Evaluation Activities for Stateful Traffic Filter Firewalls PP Module
Latest definitive SD version	V1.3, September 2019
Base PP	collaborative Protection Profile for Network Devices
Latest definitive base PP version	V2.1, 24 September 2018
Supporting Document for base PP	Evaluation Activities for Network Device cPP
Latest definitive SD version for base PP	V2.1, September 2018 (Document history date: 17 August 2018)

This document contains the lists of allowed packages and PP-Modules to which exact conformance can be claimed in conjunction with the above PP-Module. It is used in conjunction with the 'CC Conformance' section of the PP-Module to provide the complete conformance statement for the PP-Module.

Inclusion of an object on one of these lists does not imply endorsement of the object by the NDFW iTC, nor does it imply that the relevant object has been checked for compliance with the assurance requirements applicable to a PP-Configuration or ST that uses the PP-Module in conjunction with the relevant object.

PP-Module for Stateful Traffic Filter Firewalls Allowed with List
