Assurance Continuity Maintenance Report

BSI-CC-PP-0087-V2-2016-MA-01

Machine-Readable Electronic Documents based on BSI TR-03110 for Official Use (MR.ED-PP), Version 2.0.3
from
Federal Office for Information Security

The Protection Profile identified in this report was assessed according to the Assurance Continuity: CCRA Requirements, version 2.1, June 2012 and the Impact Analysis Report (IAR). The baseline for this assessment was the Certification Report, the Protection Profile and the Evaluation Technical Report of the Protection Profile certified by the Federal Office for Information Security (BSI) under BSI-CC-PP-0087-V2-2016.

The change to the certified Protection Profile comprises an update of the reference to the claimed Protection Profile [5] and an editorial correction. The change has no effect on assurance. The identification of the maintained Protection Profile is indicated by a new version number compared to the certified Protection Profile.

Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path.

This report is an addendum to the Certification Report BSI-CC-PP-0087-V2-2016.

Bonn, 29 July 2016
The Federal Office for Information Security
Assessment

The Protection Profile identified in this report was assessed according to the Assurance Continuity: CCRA Requirements [1] and the Impact Analysis Report (IAR) [2]. The baseline for this assessment was the Certification Report of the certified Protection Profile [3].

The author of the Protection Profile (BSI) generated an IAR [2] for the Common Criteria Protecion Profile Machine-Readable Electronic Documents based on BSI TR-03110 for Official Use (MR.ED-PP), Version 2.0.3. The IAR is intended to satisfy the requirements outlined in the document Assurance Continuity: CCRA Requirements [1]. In accordance with those requirements, the IAR describes the changes made to the certified Protection Profile.

The Protection Profile Machine-Readable Electronic Documents based on BSI TR-03110 for Official Use (MR.ED-PP), Version 2.0.3 was changed due to

- a correction of a single typo in OT.SCD/SVD_Gen (corrected to OT.SCD/SVD_Auth_Gen)

Conclusion

The change to the Protection Profile is at the level of editorial changes. The change has no effect on the specified assurance.

Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path.

Therefore, BSI agrees that the assurance as outlined in the Certification Report [3] is maintained for this version of the Protection Profile [4].

The maintenance process of Machine-Readable Electronic Documents based on BSI TR-03110 for Official Use (MR.ED-PP), Version 2.0.3 did use the english DIN version of the referenced EN 419211-2:2013 [5]. According to the operational procedures of CEN, each National Standardization Body that is part of the CEN system is obliged to adopt each European Standard as a national standard and make it available to customers in their country. Therefore, one European Standard (EN) becomes the national standard in all countries covered by CEN Members.

This report is an addendum to the Certification Report [3].
